

Press information – 30 years of **raumplus**

THE BEST AGE

2016 sees **raumplus** celebrate its 30th anniversary as a strong, vigorous company. Set up in 1986 by company founder Jürgen Guddas, the Bremen-based specialist for sliding doors, room dividers, and interior systems has grown and flourished continuously. When Uta and Carsten Bergmann, the second generation of the family, took over the helm in 2001 the company was already well-established. The couple has successfully developed it into today's international player. With a presence in 70 countries on five continents **raumplus** is now indisputably a "best ager".

Keeping it in the family – as the company celebrates its 30th anniversary, Nane-Sophie Bergmann, the third generation of the family, presents an innovative new **raumplus** product. The industrial designer's sliding door with adjustable LED lighting is very much in the creative tradition of her grandfather, Jürgen Guddas.

30 years ago he combined his technical know-how as a window manufacturer with a big portion of pioneering spirit to develop a second area of business – innovative sliding door systems. The foundations for the success story that is **raumplus** had been laid.

A new, ground-breaking chapter in this story was written in 2001 when Guddas handed over running of the company to his daughter Uta and son-in-law Carsten Bergmann. They have built the company into a successful international brand that stands for design, innovation, and quality 'Made in Germany'.

Products are made at the company's Bremen headquarters, located in Dortmunder Strasse since 2006. The 20,000 square meter site is home to two state-of-the-art manufacturing halls and an office building. An additional 1,500 sqm. large manufacturing plant was opened in Wildeshausen in 2014.

raumplus produces premium-quality sliding doors, room dividers, and interior systems incorporating the latest technology. No matter whether all-glass or automatic doors with magnetic technology; innovative gallery lighting or cable-free LED spots; digitally printed door panels or high-tech, in-door monitors, **raumplus** offers custom-made products that fulfil interior design dreams. As proven by the many design and architecture prizes awarded to the systems from Bremen. The latest is the "2016 ICONIC AWARD", made by the Frankfurt-based German Design Council for the innovative S1200 sliding door system.

The 2016 IMM sees **raumplus** present family-based, fresh design ideas. Industrial designer Nane-Sophie Bergmann has taken advantage of the creative possibilities offered by LED technology to create her own illuminated version of the S1200, whose light color changes over the course of the day to match human biorhythms, making for a great feeling of well-being.

And also making the company's core mission statement more topical than ever – “**raumplus** makes you happy”. All in addition to excellent product quality and first-class service; a highly motivated team of workers; and a well-established network of expert dealers all over the world.

Together they are the **raumplus** family, a family that is carrying on the legacy of the company's founder, who passed away in 2014. With success and for the 30th year.

Should you publish this article we would be grateful if you could name **raumplus** as the manufacturer.
